The diagram illustrates the layout of a sewage treatment plant. Key features include:

- Pipes and Manholes:** Pipes are labeled with diameters such as $\varnothing 225PE$, $\varnothing 200PE$, and $\varnothing 160PE$. Manhole elevations are noted as 157.90.00, 152.40, 151.80, and 152.90.
- Tanks and Basins:** A large rectangular tank is shown with dimensions 6100 by 157.90.00. Other smaller basins or tanks are indicated at different levels.
- Pumps and Motors:** Several pump units are depicted, some with motor housings, connected to the piping system.
- Structural Elements:** Foundations and structural supports are shown for the equipment and pipes.
- Annotations:** Polish text labels identify specific parts: "SŁUPKI WYCIĄGNIĘTE Z GROUNDWATERU" (columns extracted from groundwater), "PRZEWODNIKI KOSZYKOWE" (basket conductors), "PRZEWÓDNIK I SPUSZT ZE ZBIORNIKA" (conductor and outlet from the tank), and "Ciepła woda z kotłowni" (hot water from the boiler room).
